

How Do You Know When You Are Ready For A Pet

I believe that you are ready for a pet when you feel a lot of love for a certain animal. You just think about it all of the time and pretend that your stuffed animal is your pet. Then after a few days go by, you go and ask your Mom and Dad if you can have a pet.

You have to show your parents that you can take care of a pet by taking care of your toys and keeping your room clean. My Mom says that if you tear up your toys and live in a dirty room you will not be a good pet keeper. Then you go to the Library and check out books about the pet that you want. That way you will know quite a lot about your pet. It is good to read your books to your Mom and Dad so that they will understand that you are serious about wanting a pet.

You must learn to take care of your pet when it is a baby. That means that you have to be the pet's parent and feed it, give it water, keep it clean and warm. Most of all you need to keep it safe and give it lots and lots of love. I just love cats. So I got a kitten and now he is a grown up cat. I hug my cat everyday and kiss his pink little nose.
