

*If I was building a new animal services center I would call it PA W WORLD and have it like this.*

*My building would be blue in the shape of a paw print. It would also have a door as a paw print and the top of the paw print is windows. The path leading to the door would be a large paw print and people would be able to buy bricks to put their pet's name and/or paw print on.*

*When you walk in the front door you will see a lobby. In the lobby is a front desk shaped like a paw print, a table, and stools also in the shape of paw prints. The lobby will also include an adoption area. When you look up you see glass windows with doors leading to different rooms. There will be three different rooms, a cat room, a dog room and, in between, a small hospital area.*

*In our cat room, there will be a wall of cages, a place to eat, a litter area, an area to play and windows for outside viewing. The play area will have kitty wallpaper and will include scratching posts and climbing things along with all kinds of toys.*

*The dog room will also have a wall of cages, places to eat, and be a outdoor/indoor play area. The dog area will also have a place where dogs stick their nose under a faucet and get a drink. There will be a basket of toys for the dogs to pick from and outside will be fire hydrants for the dogs to enjoy.*

*The hospital area will have a place to bathe the animals, get check-ups and shots, x-rays and any other medical attention they need.*

*PAW WORLD would help find homes for animals that have been abandoned by their families. We would work with groups to volunteer once a month to help take care of the animals. We would also have programs to help educate kids on taking care of their pets. We would hand out fliers to people at stores to have people come to us to adopt a pet.*

*Our hours would be Monday-Friday from 8:00 a.m. to 7:00 p.m. and Saturday's from 9:00 a.m. to 4:00 p.m. Let's make this dream come true and help pets find good homes!*
