If I was An Animal Shelter Helper

If I was asked to help at a local animal shelter, I would help in the animal shelter by doing things that have to do with handling animals, like cleaning the kennels, feeding and housing the animals, taking care of the shelter and helping the people find their lost pets or helping them find a new pet.

I would go out with an animal control person in a truck and look for stray or lost animals and take them to the shelter so they can be warm and given food.

I would also have to pick up animals that have died or that have been injured or have some kind of disease like rabies or parvo.

I would play with the tame animals and take them for walks and potty breaks.

I would give the animals their shots for rabies and help in the office like answer the phone, filing, and help people.

Most of all I would love all the animals at the shelter.
