Essay

Have you ever worked with fuzzy animals? I think I might but I wonder what I'll have to do. Well, I would have to get something for them to eat. Of course they could be parched at times so water might help too! I bet being locked up in a cage is no fun so I want to let them get out of their cages and play. Not only will they have fun, but they'll be healthy and strong! After all you want a healthy pet right? Those poor animals might not have experienced love! I can cuddle and make sure they're happy! The poor things might get sick! I'll get them the food they need and make sure they get their rest. I'll do anything to make them feel better! Some other ways to wash them up, keep them away from people, places, things or animals who get them sick and for them to eat well. I don't want anyone getting hurt especially animals. I've got to keep them away from insects, plants or animals who hurt them! I don't want them getting hurt physically or emotionally. Speaking of emotions I have to keep them happy and healthy. I would do anything for these animals to be healthy even if I don't get anything in return. Now tell me would you work with animals even if you don't get ANYTHING in return?
