

Home Investment Partnerships Program (HOME) Projects

Neighborhood Revitalization Strategy Area (NRSAS) Housing Improvement

Over 15,000 sq. feet of vacant lots and dilapidated housing were developed into energy efficient, sustainable homes. All 9 homes in this area were equipped with Energy Star appliances and significant energy-saving features to help the homeowner reduce utility costs. These homes are located within Central Arlington close to schools, hospitals, job centers and other community amenities.

Homes for Disabled Veterans in Central Arlington

Tarrant County Housing Partnership (TCHP) worked with the Citi Military Veterans Network, City of Arlington HOME funds, Home Depot, Keller Williams Realty and DSCI to acquire and rehabilitate a vacant and foreclosed house in a low-income target area in East Arlington.

Recently, The Development Corporation of Tarrant County, a non-profit, Community Housing Development Organization, has constructed two new homes, which are available to purchase by qualified veterans.
