

ZONING ADVISORY COMMITTEE

A Zoning Advisory Committee made up of representatives from neighborhoods, the development community and other interested stakeholders has been established. The Committee will provide input on the code rewrite and act as liaisons to various interests and groups in Arlington. The Committee is a sounding board, providing input at key milestone stages throughout the project, but has no official positions or voting. Approximately six to eight meetings will be held over the 18-month project to hear presentations on the new draft code, review new portions of the code, and offer detailed feedback.
